Tools: VS Code , Figma, Eclipse

Core Skills: Problem Solving, Debugging, UI Design Understanding, Responsive Web Design

WORK EXPERIENCE

Web Developer
FDSMax, Vellore   **Feb 2025 – May 2025**

- Developed responsive user interfaces using React for multiple web-based applications.
- Collaborated with backend developers to integrate frontend features with server-side logic
- Gained hands-on experience working with databases and backend APIs.
- Participated in code reviews and team discussions to improve application performance and usability.

PROJECT

AI-Enabled Safety and Event Alerts for Local Communities
Role: Frontend Developer & Backend Collaborator

- Built a web interface for a real-time alert system to notify users about nearby safety incidents.
- Designed responsive UI to display alerts like natural disasters, crimes, and cyber threats.
- Integrated with backend services using Apache Kafka for live event data streaming.
- Collaborated with backend team to support AI-based alert filtering and impact prediction.
- Helped improve community awareness and emergency response through smart notifications.
